Many businesses offer low-cost bulk slide scans from carousel trays. Most use automated equipment that works well for home use but does not meet professional standards. Robin Imaging focuses on customers that expect the highest quality images for printing or other professional use. With quality in mind, our highly qualified technician scans each slide one at a time.

Professional Slide Scans

Our slide scans are done to a high standard and are suitable for making prints or high-quality multi-media use.

- We crop each slide so that there are no edges showing or subject matter cropped out.
- We make general color corrections. There may be further corrections needed before printing.
- We dust and check each slide for dust spots and remove them. If slides have embedded dirt or scratches, we offer digital cleaning at an additional charge. If interested, please note that when placing the order.
- Three different resolutions are available depending on the file size needed (See chart below).
- File choices are J-peg or Tiff.

Maximum Print Sizes

From 35mm Film

Scan Resolution	Max Print Size @ 150 PPI	Max Print Size @ 300 PPI
2400PPI	12x18	6x9
3200PPI	20x30	10x15
4800 PPI	30x45	16x24

- The maximum print size is also subject to the film used and the quality of the image.
